SUMMARY

Computer Science undergraduate with hands-on experience in software development and a growing focus on Data Analytics, Data Science, and Machine Learning. Experienced in JavaScript, HTML, CSS, Node.js, Express.js, Python, SQL, and building web applications for projects and clients. Currently developing skills in Pandas, NumPy, Excel, Power BI, data visualization, and machine learning. Strong problem-solving skills with experience building practical applications, dashboards, and data-driven projects.

EDUCATION

B.Tech – Computer Science Engineering	2023 – 2027
Quantum University, Roorkee	CGPA: 7.83
Class XII – CBSE	64%
Gyan Bharti Global School, Gaya, Bihar	
Class X – CBSE	83%
SVM, Maharajganj, Siwan, Bihar	

SKILLS

Programming: Python, Java, JavaScript, SQL, C

Software Development: HTML, CSS, Node.js, Express.js, MongoDB, REST APIs, Firebase

Data Analytics: Pandas, NumPy, Data Cleaning, EDA, Data Visualization, Statistical Analysis, Excel, Power BI

Machine Learning: Scikit-learn, Classification, Feature Engineering, Model Evaluation, XGBoost, SMOTE

Core: Data Structures & Algorithms, OOPs, Problem Solving

Tools: Git, GitHub, VS Code, Streamlit, Postman

PROJECTS

Credit Card Fraud Detection System *Python, Pandas, Scikit-learn, XGBoost, Streamlit*
Live Project Link

- Built and trained classification models on a 284K+ transaction dataset to detect fraudulent activities.
- Performed data cleaning, preprocessing, and feature engineering; handled class imbalance using SMOTE.
- Evaluated model performance using precision, recall, and ROC-AUC, achieving a ROC-AUC score of 0.97+.
- Deployed an interactive Streamlit application for real-time fraud prediction and batch processing.

IPL Analytics Dashboard *Python, Pandas, Streamlit, Data Visualization*

- Built an interactive dashboard to analyze IPL matches, teams, player statistics, and season-wise performance.
- Cleaned, transformed, and analyzed historical IPL datasets to identify performance trends and patterns.
- Created visualizations for batting performance, bowling statistics, win trends, team comparisons, and player analysis.
- Added interactive filters and performance metrics to support data exploration and reporting.

Email Automation Web Application *JavaScript, Node.js, Express.js, EmailJS, APIs*

- Developed a web application to automate email workflows and reduce repetitive manual tasks.
- Integrated APIs and EmailJS for automated communication and dynamic content handling.
- Designed responsive interfaces and implemented user interaction workflows.

RESEARCH PUBLICATION

Integration of Wearable Technology for Real-Time Detection of Infectious Disease Hotspots *Published Research Paper*

- Co-authored research on wearable sensors, real-time monitoring, and predictive analytics for infectious disease hotspot detection.
- Explored data-driven methods for health monitoring, hotspot identification, and improving response to disease outbreaks.

EXPERIENCE

Founder – College Brains (EdTech Initiative)

- Founded and developed an EdTech initiative providing learning resources, job opportunities, and career guidance for students.
- Created and managed 1200+ content pieces across technology, education, and career-related topics.
- Used audience feedback and analytics to improve content planning, communication, and engagement.

CERTIFICATIONS

Master Microsoft Power BI from Basics to Advance – Udemy, 2025

Basics of Data Analytics – Physics Wallah / Microsoft, 2026

Excel Skills for Business Intermediate – Mindluster, 2025

AI for Business Analysts – Udemy, 2025

ACHIEVEMENTS

- Solved 150+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Participated in national-level hackathons and technical competitions.
- Built and deployed multiple Data Analytics, Data Science, and Machine Learning projects.
